

Project Due Wednesday, January 20th (at the start of class)

MASTER STUDY:
An Exploration of Comics & Animation

For this project you will find an image of your favorite comic or cartoon and recreate it using Adobe Illustrator. Please use all of the techniques that we have learned in class and either ask me if you have any questions regarding Illustrator or consult your book. By this stage of your development in Illustrator you should be able to complete this in the 3 hours of class time, but if you do not you will have to work outside of class to have this done by Thursday.

Step 1: Decide what your favorite cartoon or comic is.

Step 2: Search the internet for a *high resolution* image:

Step 3: *Import* the image into an Adobe Illustrator document. *Lock* the image and/or *import* the image onto another *Layer* and lock that *layer*.

Step 4: Trace over the image to recreate it using the *pen tool* and *shapes*. Other techniques and tools can be employed as long as you are using them properly.

Step 5: When finished, *attach* the Illustrator document to an email and email me your file at: **davidmazure@yahoo.com** (please include the original *high resolution* picture you downloaded from the internet – and make sure it is *Linked!*)
Your email should include your name, otherwise it will not be accepted.

Good luck!
